

"Explore the mysteries of the underwater world"

Completely surrounded by the warm water of the Indian Ocean, Sri Lanka offers wonderful opportunities for underwater exploration whatever your pleasure; from actively scuba diving deep in the ocean accompanied by schools of tropical fish to simply admiring the scene languidly from the surface through a mask and snorkel. A multitude of exotic fish, kaleidoscopic coral reefs, mystical underwater landscapes and historic ship wrecks can be explored at several easy to get to locations off the south and west coasts of Sri Lanka.

At our centers in Bentota and Hikkaduwa, we provide unforgettable scuba diving and snorkeling adventures with all essential equipment provided for. Each of our underwater activities is conducted by fully trained and experienced UDI and PADI instructors to ensure your absolute safety and enjoyment throughout. Diving can only be offered for experienced divers with a valid internationally recognized license (such as PADI).

Due to the monsoon seasons, diving and snorkeling on the southwest of the island is generally best from November to April whilst the waters of the east coast, where excursions can be arranged with us on request, are calmest between May and October.
